The MULTISPEED machine is designed for the blowing AND suction of all fibrous products into the attic space of individual houses: rock and glass wools, cellulose wadding, cotton wool, wood and cardboard fibers, etc.

Its compact size, and heightened / enlarged loading platform (which allow the user to place an entire bag) make it particularly easy to use.

This machine is also equipped with a radio remote control and a vacuum kit, perfect to remove old insulation products from the attics (easy storage with the big bags especially designed for this use).

This machine consumes very little electricity and can be connected to any 230 Volt single-phase output.

DATA SHEET

CHARACTERISTICS	MULTISPEED
Dimensions (cm)	L 94 / W 70 / H 112
Weight (kg)	90
Power supply (booster)	1 motor
Air (m3/h)	2000
Air (millibar)	30
Motor	2,2kw 230v mono 10A
Flow rate (kg/h)	300
Max. hose length (m)	40
Hose diameter (mm)	100
Max. vertical drop (m)	15
Blades and volute	Stainless steel
Feeding	manual
Sound level	77 dB
